

PORTFOLIO DEFINITION

Cautious

The portfolio aims to provide modest capital and income appreciation. There is an emphasis on capital protection with a significant element invested in lower risk investments to reduce short-term equity market volatility. It aims to retain the real spending power of the investment.

Returns are achieved through a diversified multi-asset portfolio of lower risk and medium risk investments, with a bias towards medium risk. It does not invest in higher risk investments. Typically up to half of the portfolio is invested in equity markets.

MARKET UPDATE

In September 2024, global markets started on a cautious note, as concerns over a US economic slowdown weighed on investor sentiment. Signs of a softening labour market and inflation nearing target prompted the US Federal Reserve to lower its benchmark interest rate by 0.5 percentage points, marking the first cut since 2020. This move buoyed global stock markets, helping them recover losses from earlier in the month. Asian markets, particularly in China, surged as Beijing introduced a major fiscal and monetary stimulus package, leading Chinese stock markets to their best weekly performance since 2008.

Bond markets also rallied on the Fed’s rate cut, as falling cash rates made fixed-income assets more attractive. “Bond proxy” sectors, such as utilities and real estate, also saw strong gains, while UK government bonds lagged as the Bank of England opted not to cut rates due to persistent wage inflation. The higher interest rate now available on Sterling will have contributed to the US Dollar’s 2% fall compared to the pound in September.

Global equities ended the month roughly where they began, with Asian markets outperforming. UK equities underperformed, possibly due to selling ahead of the UK Autumn Budget. Oil prices hit their lowest level in over two years, as concerns over weakening global demand outweighed geopolitical tensions in the Middle East.

As we enter the final quarter of 2024, inflation concerns are receding, and focus is shifting towards broader economic health. We remain optimistic for a “soft landing,” with inflation declining and modest growth continuing, despite a slight uptick in unemployment, which we believe reflects an expanding labour force rather than deeper economic troubles.

PEAK TO TROUGH

-14.47%

- OCF - An Ongoing Charge Figure (OCF) is made up of the underlying fund manager’s charge and a variety of other operating costs.
- YIELD – A Yield is income produced by the portfolio
- FE RISK RATING – A measure of risk relative to the leading 100 UK shares (which has a score of 100). For example, a score of 50 indicates the strategy has previously exhibited half of the volatility of this index.
- AMC – The annual fee that CIM charge to manage the portfolio.
- PEAK TO TROUGH- is also known as Maximum Drawdown. This represents the worst possible return over a period (July 2012 to September 2024) - for example, buying at the maximum price over the period and selling at the worst price.

WHY CHOOSE CHETWOOD INVESTMENT MANAGEMENT?

Chetwood IM is a dedicated multi-asset investment manager that is trusted to direct the accounts of thousands of clients across the UK.

Clients trust us as the stewards of their capital due to the expertise we have acquired over many years.

Successful investing requires skill, experience and significant resources. We use the power of leading technology, research insights, active management and risk discipline. Our expertise has been forged by successfully navigating through the most challenging market environments.

With deep roots in the wealth management industry, Chetwood IM understands that our most important goal is to create successful investment outcomes for our clients. We recognise that it is strong returns delivered with diligent risk management that ultimately achieves our client's objectives.

The Chetwood IM investment process is founded on a structured and robust strategic asset allocation. We invest across multiple asset classes in order to access globally diversified sources of return. We use market leading technology to monitor our clients progress and ensure we incorporate the insights we learn to develop our investment process over time. Chetwood IM delivers the institutional approach shared by the largest and most sophisticated global investors to retail clients.

We combine our proven process with a deep passion for investments and a commitment to constantly improve the portfolio returns we can generate. Our investment edge is our ability to maximise our client's participation in the growth of markets whilst reducing the downside risk.

INVESTMENT STRATEGY

The aim of the Cautious Portfolio is to grow the value of your original investment over the long term with an investment horizon of at least 5 years. The portfolio seeks to have an emphasis on capital preservation with a reasonable exposure to global equity markets. The strategy is actively managed and aims to outperform its respective benchmark. The portfolio may be more suitable for clients that are looking for capital accumulation.

IMPORTANT INFORMATION

Chetwood Investment Management Limited is authorised and regulated by the Financial Conduct Authority. Our regulation details are set out in the FCA register: Firm Reference No: 835233.
